## THE CRAFT BREWER'S PORTFOLIO

## TECHNICAL DATA SHEET

# Craft Redox

### FORMULATION

Craft Redox is a special formulation made up of 50% potassium pyrosulfite (E224) and 50% L-ascorbic acid (E300). Craft Redox ensures total protection against oxidation and protects musts' and beers' aromatic potential. Craft Redox is easily dissolvable. This product complies with current legislation and its tested in a specialised laboratory for its quality and purity.

### APPLICATION AREA

Craft Redox is an effective protection for musts against oxidation, preserving its organoleptic qualities. The specific formulation gives it a very high anti-oxidant capacity and thus an excellent protection of musts against the effects of oxygen. Craft Redox significantly reduces the dissolved oxygen in the must and thus helps to prolong the freshness of the finished beer.

### TECHNOLOGICAL BENEFITS

- Removes dissolved oxygen in the must,
- Avoids oxidation,
- No negative effects on aromas or taste
- Helps to maintain organoleptic quality

### RECOMENDED DOSAGES

Dosage: 1 to 4 g/hL of wort

1 g of Craft Redox brings 2,5 mg/L of SO<sub>2</sub>.

### INSTRUCTIONS FOR USAGE

Add directly Craft Redox in the brewing water.

### STORAGE

Store in its original packaging hermetically sealed, in a cool (<10°C), dry and odorless place.

Respect the optimal use-by-date appearing on the conditioning. Use quickly after opening.

### CONDITIONING

1 kg package (10\*1 kg box).

CC/22-08-2019

For use in beer brewing. For the production of products destined for direct human consumption. This document is provided for information purposes only, without commitment or guarantee, according to our current knowledge. Product in compliance with the purity specifications recommended by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) and by the FCC for enzymes used in foodstuff processing. The product's conditions of use are subject to adherence to current legislation and local standards.
