

FORMULATION

Special formulation, highly soluble, composed of 50% potassium pyrosulphite (E224) and 50% L-ascorbic acid (E300). BeerRedox provides complete protection against oxidation and preserves the aromatic potential of wort and beer. The product complies with current legislation and is tested in a specialised laboratory for quality and purity.

APPLICATION FIELD

BeerRedox provides effective protection for wort against oxidation, preserving its organoleptic qualities. Its specific formulation gives it very high antioxidant capacity, ensuring excellent protection of wort against the effects of oxygen. BeerRedox significantly reduces dissolved oxygen in the wort, thereby helping to prolong the freshness of the finished beer.

- Removes dissolved oxygen in the beer.
- Prevents oxidation.
- No negative effects on aromas or flavour.
- Helps to maintain organoleptic quality.

RECOMMENDED DOSAGE

- **Dosage:** 1 to 4 g/hL of beer.
- 1 g of Beer Redox provides 2.5 mg/L of SO₂.

INSTRUCTIONS FOR USAGE

- Add Beer Redox directly to the brewing water or the beer.

SPECIFICATIONS

PHYSICAL

Appearance & colour	Beige powder
Humidity	≤ 2%

HEAVY METALS

Lead	≤ 3.5 mg/kg
Mercury	≤ 1 mg/kg
Arsenic	≤ 3 mg/kg

PACKAGING & STORAGE

- 1 kg bag.
- Store in its original sealed packaging, in a cool, clean, dry, and odor-free place. Respect the «Use By» date on the packaging. Use quickly after opening.
