

# Brewline THE BREWER'S PORTFOLIO

#### **TECHNICAL DATA SHEET**

# Pop Ale

A strain characterized in collaboration with the "Brewing Sciences and Fermentation Technology" department of the Meurice Institute in Brussels. POP Ale is the result of a rigorous selection of brewing yeast strains. It produces beers with good length on the palate and a high aromatic intensity, with fruity notes that integrate perfectly with the hops' aromas. POP Ale is recommended for pale ales and for all styles of aromatic, high-quality top-fermenting beers. This product complies with current EU regulations. The purity and quality of this product are verified by a specialized laboratory.

### **BREWING PROPERTIES**

Latency : short

Limit attenuation: 75-77 %
Alcohol tolerance: 8,5 % v/v
Ester production: 25-30 mg/l

Higher alcohol production: 200-220 mg/l

Diacetyl and Pentanedione production: < 25 ppb</li>

Sulfite production : nullFloculation : very highSédimentation : medium

#### **CARACTERISTICS**

Viable yeasts: > 5.10E9 CFU /g
Other yeasts: <1.10E5 CFU /g</li>
Total bacteria: <5.10E3 CFU /g</li>

#### **RECOMENDED DOSAGES**

Primary fermentation : 50-100 g/ hl

Optimal fermentation temperature : 15-25°C

## **INSTRUCTIONS FOR USE**

- Add the necessary amount of yeast into 10 times its weight in water or sterile must at 23°C +/- 3°C. Mix gently and leave to rest for 15 min.
- In order to ensure a correct yeast metabolic activity, lower the temperature of the starter by adding an equal volume of water or sterile must.
- Wait 5 minutes and, if necessary, add again the same volume of water until the temperature difference between the yeast and the fermentation tank is less than 10°C.
- Add the yeast to the fermentation tank.

#### **STORAGE**

- Bottled under protective gas cover. Keep sealed in original packaging in a cool (<10°C), dry place.</li>
- Respect the optimal use-by-date appearing on the conditioning.
- Remove air and close immediately once opened, should then be kept at 4°C for up to 7 days after opening.

#### **CONDITIONING**

- 100 g package.
- 2 kg box (4x500 g)

PF/05-11-2021. For use in breweries. For the preparation of products for direct human consumption. Information given for information only and according to our current knowledge, without any commitment or guarantee. Produced in accordance with the purity specifications recommended for enzymes used in food processing by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) and the FCC. The conditions of use of the product are subject to compliance with local legislation and standards.
